**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The examiner is unsure if applicant is claiming the combination of the apparatus and the game call or the subcombination of the apparatus only. This in turn, is because while line 1 of the claim appears to indicate that applicant's intention is to claim only the apparatus, the claim recites limitations that are dependent on the game call (Note lines 1 and 2, for example). In this Office Action, the examiner presumes that the applicant's intention is to prosecute the subcombination of the apparatus, in order the claim is given their broadest reasonable interpretation. Accordingly, all additional limitations that are dependent on the game call are not considered further structurally limiting the with respect to the claimed apparatus.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3712

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Waltz.

Waltz teaches in the figures a method of retaining a game call comprising the steps of providing (80), inserting (fig.2) and manipulating the plurality of rim gripping members (col. 3 par. 2).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Musacchia in view of Waltz.

Musacchia teaches in the figures most of the elements of the claimed invention, including a plurality of structures (14,16), an adjusting mechanism (col.4, lines 64-67). However, Musacchia fail to teach non-elastic structures. Waltz teaches in the figures a holder device 10 that is fabricated from metal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use non-elastic structures as taught by Waltz for the structures of Musacchia for the purpose of providing a more secured holding for the game call.
